LANGUAGES

English: Fluent
French : Novice/ limited working proficiency

PROFILE

I am a motivated and driven web developer who is deeply passionate about building user-friendly products. I strive to be organized and pay meticulous attention to detail in everything I do. With a creative mindset, I bring a fresh perspective to my team and consistently contribute innovative ideas. Writing clean and reusable code is a top priority for me, and I actively seek opportunities to make open source contributions. I am always open to learning new things and believe in personal and team growth. When taking on new projects, my primary focus is on functionality and delivering an exceptional user experience. One thing that truly fuels my passion is the ability to build products that people actually use.

WORK EXPERIENCE

Front End Developer Intern

02Hero tech Consulting   March 2023 - April 2023

- Worked in sprints in an agile environment with Scrum Masters and other team members
- Responsible for developing projects from scratch
